

First again!

The Hoffmann Group is now AEO* certified for the simplified and "secured" export processing to EU guidelines.

"We are strong in export" – that is the tenor of the German machining industry. Strict guidelines regulate the international exchange of goods – as the first in the trade sector the Hoffmann Group has the AEO certificate as an approved authorised economic operator. Particularly for export-oriented customers this has valuable advantages:

- Simplified and faster clearing (especially for the report)
- For exporting customers Hoffmann is a "certified" supplier (this standard will be desired/required prospectively by all parties concerned, similar to ISO 9001)
- First-class export processing due to a secured supply chain: the high quality standard leads to less often delivery checks
- Qualified specialists of the Hoffmann Group support you with your export questions
- Also the legitimacy of export orders is being approved by the AEO certification

*) Authorised Economic Operator

 European Community			
AEO Certificate
