

GUIDELINE

RFID Chips, RFID Accessories and Recommended End Devices

Order RFID Chips

You need an RFID chip for each tool holder and accessories that you want to identify or locate later. You also need an RFID chip for every possible location (machine, storage location, box, tool trolley, drawer, etc.). By scanning the corresponding RFID chips, you can then digitally document the location of each complete tool or accessory and can thus be retrieved at any time.

RFID Chips and assembly accessories

RFID Chip Plug

For tool holders

Art.-Nr.: 085673 PLUG

RFID readers and recommended end devices

To scan the RFID chips you need a so-called RFID reader. This RFID Reader Pen can be connected to a desktop or mobile device via USB and has a USB 2.0 port.

RFID chips and mounting accessories

RFID Reader Pen

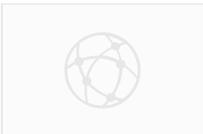

Art.-Nr.: 085670 PEN

Tablet

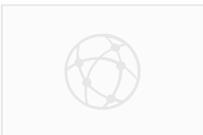

Samsung Galaxy Tab A 10.1" 32GB

Smartphone

Huawei P smart 2019

Optimal for stations with many link processes - e.g. presetting device, as there is no need for an additional pin.

App

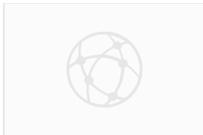

Hoffmann Linking App

If smartphones are used for link processes, a corresponding app is required for security reasons. **Start: Jan./ 2021**

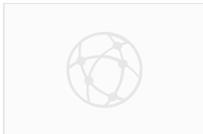

Holder for RFID Reader Pen and Tablet

If you have decided to use the RFID Reader Pen in combination with Tablet "Samsung Galaxy Tab A 10.1" 32GB", we also recommend the following accessories for easy handling:

USB Type-C Adapter cable, Typ C to A
Recommendation (Adapter)

OtterBox Utility Series Latch II 25,4 cm (10") Protective cover
Recommendation (Mount)

Application example

Cable and pen are stored in the holder and attached to the tablet:

Front side:

Rear side:

Optional: Additional RFID tag as storage location for a possible picking process or similar
