LogiMAT 2017: Easily configure worktops online

Munich, 14 March 2017 – Hoffman Group has expanded its online planning service for workstations and storage. As of now, customers can design their worktops for GARANT workstations and storage themselves, using the new eShape online configurator, and obtain a non-binding quotation with just a few mouse clicks. This means that they have greater creative freedom and receive their products promptly after placing their order. eShape will be showcased for the first time at the 2017 LogiMAT trade fair in Stuttgart.

It is sometimes necessary to manufacture worktops for industrial workplaces individually so that ventilation grilles or cable outlets can be integrated in the optimal manner. With the new eShape online configurator from Hoffman Group, this is an extremely simple process. As soon as he or she has registered in e-shop, the customer can immediately start planning: the customer selects a worktop which is on stock and the required functions from the database and, using drag & drop, specifies the locations where cut-outs and cable outlets are to be made or where the worktop should be shortened – and all this is possible from anywhere in the world. This is due to the fact that an internet browser is the only thing needed to use eShape. The customer can request a binding quotation via the shopping basket and, having placed the order, will soon receive the new worktop. This will be installed on site by Hoffman Group fitters on request.
